PLANTERS 101

There is nothing like the look and feel of a classic planter to bring out the beauty of any space. Incorporating design elements from ancient Roman vessels to iconic mid-century ceramics, our incomparable modern styles bring life to any commercial or residential environments. With their substantial construction, rich glazes and the extensive range of colors, styles and size choices, Gainey Ceramics can meet the needs of any designer and any room or area.

An industry legend, we have proudly manufactured ceramic planters in California for 60 years. Responding to the changing tastes and new manufacturing materials, we have developed a complete line of lightweight fiberglass products as well as glass-reinforced concrete planters (GFRC).

At Gainey we strive to make all our products as green as possible, with many eligible for LEEDS credits. We use at least 25% recycled materials in our ceramic products and they are manufactured locally. For more details, check out our green statement at www.gaineyceramics.com.

Revision 06/22/2009

Gainey Ceramics Inc. Green Corporate Commitment

Gainey Ceramics has been “Green” for many years. We have done this not only due to requirements of the state of California, which has arguably the strictest emissions control in the country, or to be trendy, but in order to be a smart sustainable manufacturer.

To serve our customers’ needs, we provide planters made from three materials: ceramic, fiberglass and glass fiber reinforced concrete (GFRC). Of these materials, ceramic is the greenest, fiberglass and GFRC although considered clean products, may not qualify as green. GFRC and fiberglass are not produced in our California facility.

Gainey’s, ceramic products are produced 100% at our factory in California. All of our clay bodies contain in excess of 25% recycled materials. Clay materials come from California, Texas and Georgia. All water used in the production process at our facility is recycled back into our clay; we do not dispose of any waste water from the production process. Any ceramic product lost in the production process is re-ground into powder and reintroduce into the clay.

In our spraying operations we do not vent our spray booths to outside air. Glaze overspray is trapped in fabric filters and is recycled. After the air passes these filters it continues through a series of cartridge filters, at that point it is so clean the air is vented inside our facility. Over the years, Gainey has significantly reduced hazardous materials used in our glazes. Ceramic glaze coatings contain zero volatile organic compounds (VOC).

Over the last few years we have also purchased more energy-efficient kilns that have lower emissions. These kilns are so efficient that Gainey has established the standard of Best Available Control Technology (BACT) for oxides of nitrogen (NOX) and oxides of sulfur (SOX) emissions within the Southern California Air Quality Management District (SCAQMD). This is the highest standard available and dictates vigilant monitoring of all emissions from our manufacturing process.

Our drying process has been completely reinvented; we now use waste heat from our tunnel kiln to keep our drying rooms at a constant 150 degrees.

Gainey has taken the steps to comply with the EPA standards under the 1990 requirements of the Clean Air Act. We are so clean that we are no longer required to function as a manufacturing company under Title 5 status.

As we develop new products, we will continue to move forward with sensitivity to the environment and a commitment to do what is right.

We are a proud member of the US Green Building Council.

Morgan

With its clean lines and timeless appeal, the Morgan collection is fast becoming the new Gainey classic. It is available in both eco-friendly ceramic and fiberglass.

GFRC

There is nothing like the strength of Glass Fiber Reinforced Concrete (GFRC) to stand up to the harsh elements of the great outdoors. GFRC blends fiberglass and reinforced concrete, so it is lighter in weight than concrete and more durable than fiberglass itself. Available in eight colors as part of our standard product line, we can easily customize it to meet many color requests.

TERMS & CONDITIONS

Effective Date 03/15/2009

CREDIT TERMS:

- Net 30 for established customers with terms already set up.
- All orders for new and/or non-term customers will be billed on prepayment terms. (VISA, MC or AMEX).
- All prepay orders will be billed at the time the order is placed.
- 50% deposit is required on receipt of all custom orders.

SHIPPING:

- All orders are FOB Gainey Ceramics.
- All orders under \$500.00 that need to be palletized will be charged a \$50.00 handling fee.

BREAKAGE:

- Credit and/or replacement cannot be issued unless breakage is noted on the delivery receipt.
- If breakage occurs, please notify Gainey Ceramics within 48 hours in order to process a claim.
- All damages must be inspected and noted on the delivery receipt, both the driver copy and your copy and a claim filed with the carrier.
- Fax a copy of the delivery receipt to Gainey Ceramics at 909-596-9337. Contact your Gainey Ceramics customer service representative immediately.

RETURN AND EXCHANGE POLICY:

- All items are made to order.
- No product may be returned to Gainey ceramics without written consent.
- Authorized returns are subject to a 25% restocking fee.
- All returned goods must be sent back prepaid within 3 days of receiving our written consent.
- Credit is subject to inspection by our receiving department.
- Any product not returned in resalable condition will not be credited the full amount.
- All unauthorized returns will be returned to the customer freight collect.

CANCELLATIONS:

- Orders not canceled within 24 hours will incur charges.
- Care must be used on all orders in specifying quantities and colors, as no allowances will be made for returns unless it is our mistake in filling the order.
- Orders that are already palletized and ready to ship will incur a \$100 charge for changes and/or cancellations.

DISCLAIMERS:

- All colors are represented as accurately as possible.
- Photographic procedures may alter the hues and textures.
- Shape, texture, and color variations are inherent characteristics of all ceramic and fiberglass planters.
- Planters/containers received may differ from sample chip or sample planter/container submitted.
- Any questions regarding acceptability of products must be resolved **prior to installation, no adjustments will be made after installation.** Please contact a company representative if you have any questions .
- Gainey Ceramics assumes no risk for damage incurred in transit.
- All items are shipped at purchaser's risk.
- Containers that are found to be defective will be repaired or replaced at Gainey Ceramics' discretion.
- Products and finishes not shown on the web site or in the current Gainey catalogs are considered to be special order items. Please contact Gainey Ceramics to see if these products and finishes are still available.

PROCEDURE TO MAKE A CLAIM:

- The original purchaser must notify Gainey Ceramics in writing within 30 days of the occurrence of any manufacturer's defect.
- No claim will be honored without the product having been inspected by a Gainey Ceramics representative.
- Gainey Ceramics may require a photo as a proof of claim.

RECOMMENDATIONS FOR OUR PRODUCTS:

- We strongly recommend drilling and sealing all containers that need to be direct planted. Please speak with your representative about reinforcing fiberglass planters that will be direct planted.
- Fiberglass planters that are direct planted must be sealed, reinforced and drilled.
- Fiberglass planters should be washed and waxed on a regular basis.
- Ceramic products will craze, to keep them looking their best a regular washing using a product like Lime Away, followed by the use of a good quality tile sealer will keep them looking their best for years.
- Gainey Ceramics does not recommend the painting of its ceramic planters and will not warranty them.
- Sealing is available upon request for an additional 5% charge.
- If our fiberglass planters are used outdoors and are exposed to freezing temperatures, drainage holes should be supplied and will incur a 5% charge.
- Ceramic and Fiberglass planters will not be drilled unless specified.
- Ceramic planters should not be subject to freezing temperatures.
- * Planters should never be placed on any surface as moisture from condensation may damage that surface. We recommend the use of saucers, cork mats or plexi trivits to elevate planters from all surfaces.

Colors are represented as accurately as possible. Photographic procedures may slightly alter the hues and textures. Please contact your authorized Gainey Ceramics Container distributor for samples.

All of Gainey's ceramic products are proudly made in the USA.
