COMPREHENSIVE GUIDE

SIMPLY VERTICAL PLANT SYSTEMS™

Planter Tray

The essence of the Simply Vertical system is the Planter Tray. Designed for mounting to metal frames or directly to the wall, the tray holds virtually any 6" grow pot and is easily planted and replanted. Planter Trays are available in three sizes — 24"L, 36"L, and 48"L — allowing the creation of walls of many different dimensions.

Wicked Grow Pot in Tray with Water

Wicks have long been a successful method for extending watering cycles in commercial environments. By applying wick technology to a tilted grow pot, watering cycles of 10 days to 3 weeks can be achieved. Simply add the specified amount of water to each tray and allow the tray to go empty for a few days before watering again.
