JAY SCOTTS FIBERGLASS PLANTERS ARE:

- Made of high quality construction
- Attractive décor enhancers
- Ideal for commercial or residential use
- Durable
- Light weight
- Perfect for Indoor/Outdoor use: weather proof UV protection, frost-resistant
- Low maintenance with minimal care required (occasional wax/polish)

JAY SCOTTS KNOWS FIBERGLASS!

There are lots of choices when it comes to fiberglass products. How do you know you're selecting the best products? Knowing how products are made can help you make the best decision when choosing a fiberglass product.

Jay Scotts fiberglass planters are constructed of the highest quality materials prepared by highly skilled craftsmen made to last and to maintain their beauty for years to come!

Top quality fiberglass planters are truly a work of art that requires many progressive steps over a period of time by expert artisans to create Jay Scotts finished products.

Each fiberglass planter is created with a custom ceramic mold in the exact size, shape and dimensions of the final product. Then fiberglass sheets are carefully and expertly cut, shaped and inserted into and surrounding the mold. High quality polyester resin is then applied several times over the ceramic mold (depending on the size and shape of the planter) to create the final product.

Once the final coat becomes hard, the planter will then be taken to the finishing department where each of Jay Scotts products is meticulously finished by hand by highly skilled artisans.

Like an expensive fiberglass boat or car, the finishing department, trims the product of any excess materials and evenly sands the fiberglass surface so that the finish is even and smooth.

This process is labor-intensive, but necessary to produce the reliable, durable quality products that Jay Scotts customers have come to love and to expect. Many competitors take shortcuts that become obvious in the esthetics, quality and wear of fiberglass planters, which is why the hand finishing process is so important and have become the hallmark of Jay Scotts success and quality in producing fine planters.

PREPARING YOUR JAYS SCOTTS PLANTER

Jay Scotts planters are designed to be used outdoors without saucers and have 1/8" feet built on them to help water drain and to prevent water being trapped under the planter when used in the elements.

PLEASE NOTE:

We recommend that all planters be used with POTTING, or a light soil mixture.

POTTING SOIL is specially formulated for planter and container gardening and is usually a mixture of soil, hummus and peat, but varies according to mixture. To ensure you are using the correct type of POTTING SOIL for your plant(s), check with a professional to determine the correct regional and plant specific soil to be used. Heavier soil and "dirt" absorb and retain more water which can apply strong pressure to the walls of the planter and can cause structural damage in larger planters. Plants with nursery pots can be set directly into the planter, but depending on the type of plant(s), you may also put plants straight into the planter(s).

You will need:

- Drill and Drill Bits
- Landscaping Fabric
- Gravel
- Potting Soil

By using layers of landscaping fabric and gravel under the soil, water in the planter will be filtered reducing soil loss through the drainage holes. In addition this will help keep plant(s) healthy and prevent root rot. Drilling Drainage Holes in your planter: Our planters are designed for indoor or outdoor use. If you are using your planter outdoors, you will need to drill drainage holes to allow excess water to drain from the planter. If you are using your planter indoors, you may use a self-irrigation system or drill drainage holes. Please check with a sales associate for our availability of saucers for indoor use. Our planters are designed to allow drainage holes to be drilled in the bottom of the planter with no adverse effects to the life or performance of the planter. Drainage holes may be drilled with a standard drill bit. No special tools are required.

1. Determine how many and what size drainage holes you will need.
2. Using a marker, mark the bottom of the planter with guides for drilling holes.
3. Carefully drill through the base of the planter straight through the material.

PLANTING IN YOUR JAY SCOTTS PLANTER

1. Cut out two layers of landscaping fabric slightly larger than the interior dimensions of the planter.
NOTE: if you are using a drip irrigation system, you may want to insert your tube(s) through your drainage hole(s) to make them less conspicuous.
2. Place a layer of landscaping fabric inside the planter completely covering the bottom of the planter.
Allow the edges of the fabric to rise around the edges of the planter.
3. Place a layer of gravel in the planter on top of the landscaping fabric. This layer can be up to several inches deep.
4. Repeat steps 2 and 3.
5. Pour or scoop a layer of potting soil into the planter. Use enough potting soil to accommodate the roots of your plant(s).
6. Once your plant(s) are planted, add potting soil or a topping of your choice (such as small pebbles or moss) to cover the roots of your plant(s). Consult a professional to determine the type of topping that will suit your plant(s).

TERMS AND CONDITIONS

WHOLESALE ACCOUNT:

- Apply online with your basic company information at www.jayscotts.com. Some additional documentation may be required.

PAYMENT:

- Jay Scotts does not offer terms.
- All orders must be prepaid at the time the order is confirmed.
- Method of payment: Check, Visa, MasterCard, American Express, Discover card or Echeck with signed authorization.
- Signed Credit Card Authorization forms are required for every order. By law, we cannot keep authorizations on file.
- Custom planter orders require a minimum 50% non-refundable deposit.
- Custom color order fees are non-refundable.
- Returned checks will incur the maximum processing fee as allowed by law.
- 1.5% discount is offered for payment by Echeck.

ORDERS:

- Orders are processed upon payment. Payment reserves inventory for your order. Paid orders are placed in the finishing queue.
- Sales Confirmation will be sent upon receipt of payment. Customer must review all details including but not limited to color selection, quantity, bill to and delivery address and drainage hole request.
- Changes to existing orders (including but not limited to quantity, color or planter style) must be made in writing to info@jayscotts.com or faxed to 954-922-3940 and acknowledged and approved by Jay Scotts within 24 hours of payment.

ETA:

- Estimated Time of Arrival appears on the sales order and is the date inventory arrives to the port.
- Backorders will be filled within 7-21 business days of the arrival date of a shipment.
- Backorders will be shipped as available without notice.

CUSTOM PLANTER ORDER:

- Custom planters require a product development design/mold fee.
- Products developed become the property of Jay Scotts Company unless otherwise agreed to in writing.

SHIPPING:

- Orders are FOB Jay Scotts Company, Dania Beach Florida.
- Standard orders are curbside delivery only.
- Orders requiring special handling instructions or White Glove Delivery will incur additional charges.

DAMAGE:

- Order MUST BE INSPECTED by the customer AT THE TIME OF DELIVERY and any exceptions or damage noted on the bill of lading.
- Damage must be reported in writing immediately to Customer Service info@jayscotts.com or faxed to 954-922-3940.
- Photos of any damage, cartons and packing material must be submitted along with our Customer Return Authorization form.

RETURN POLICY:

- Returns acceptable only within 14 days of receipt and no product may be returned to Jay Scotts without written consent.
- All unauthorized returns will not be eligible for refund or credit.
- Returns must be in original box with all packing materials.
- Customer will be assessed original shipping cost and is responsible for pre-paid shipping for returns.
- Custom Planters and planters with drain holes are non-returnable and non-exchangeable.
- Credit for returns is subject to inspection and deemed in good condition by our receiving department.
- Authorized returns are subject to a 25% restocking fee.
- Merchandise credit refunds only. No cash refunds given.

RECOMMENDATIONS:

- Planters are not pre-drilled for drainage. You must specify if drain holes are required.
- Fiberglass planters should periodically be washed and waxed to maintain their beauty.
